

JJT UNIVERSITY

VIDYANAGARI, CHUDELA DISTT-JHUNJHUNU

(Distance from Jaipur-200 Kms, From Delhi-280 Kms)

JJT University has been established with a commitment to make higher education available to the door-step of all those who are deprived and provide object-oriented modular education with emphasis on practical knowledge keeping in view the emerging industrial, business opportunities and researches globally in different areas of science and management. The University is seeking strategic alliances and academic collaboration with Top most Universities of India and abroad for teaching & researched.

The JJT University wish to provide knowledge and educate students in science, technology and in other areas so that instead of job-seeker they become provider/creator of jobs and they will serve the nation and mankind at large in the 21st century with the purpose of building up a society based on equality, fraternity, peace and harmony, fostering the high standard of ethical and democratic values.

Emerging of RLJT

While working in this area it was felt that there is urgent need for moderate to excellent health care facilities in these places. Near about 4.5 Lac people are residing in Jhunjhunu and about 3.5 Lac in Churu (total about 8 lac people). Both districts have scarcity of super speciality medical facilities & for serious injury or any emergency, people have to travel Jaipur or Bikaner for their treatment.

Recognizing the need a Hospital equipped with modern medical equipments was planned by Rajsthani Sewa Sangh so that medical education can be delivered along with medical facilities. The primary motto is to offer excellent services for the patients suffering from various diseases and to provide accessible, affordable, accountable, effective and reliable primary health care and bridging the gap in rural health care.

Goal

- Reduction in Infant Mortality Rate (IMR) and Maternal Mortality Ratio (MMR)
- Universal access to public health services such as Women's health, child health, water, sanitation & hygiene, immunization, and Nutrition.
- Prevention and control of communicable and non-communicable diseases, including locally endemic diseases
- Access to integrated comprehensive primary healthcare
- Population stabilization, gender and demographic balance.
- Promotion of healthy life styles
